3 Business Validations

- Political Party name is max 100 characters.
- Political party founder name is max 100 characters.
- Political Leader candidate name is max 100 characters.
- Political Leader state name is max 100 characters.
- Development title is max 100 characters.
- Development activity is max 100 characters.
- Development budget is max 100 characters.
- Development state is max 100 characters.
- Development activity month is range is from 1 to 12
- Development activity year range is from 2021 to 2040.

4 REST ENDPOINTS

Rest End-points to be exposed in the controller along with method details for the same to be created

Class Name	Method Name	Purpose Of Method
	get(self,request,pk=None,format=None)	Get a political party by Id and Fetch all registered political parties.
PoliticalPartyView	post(self, request,format=None)	Registering thepolitical party.
	patch(self,request,pk,format=None)	Update thepolitical party.
	delete(self,request,pk,format=None)	Delete thepolitical party.
	get(self,request,pk=None,format=None)	Get a Political Leader by Id and Fetch all registered Political Leaders
PoliticalLeaderView	post(self, request,format=None)	Register a Political Leader
	patch(self,request,pk,format=None)	Update the existing Political Leader
	delete(self,request,pk,format=None)	Delete an existing Political Leader
PoliticalLeaderByPartyView	get(self,request,pk=None,format=None)	Fetch all Political Leaders registered with a Party
	get(self,request,pk=None,format=None)	Get a Development by Id and Fetch all created developments
DevelopmentView	post(self, request,format=None)	Create a Development Plan
	patch(self,request,pk,format=None)	Update the existing Development
	delete(self,request,pk,format=None)	Delete an existing Development
DevelopmentByLeaderVie w	get(self,request,pk=None,format=None)	Fetch all Developments created for a Political Leader

Resources (Models)

Class	Description	Status
PoliticalPartyModel	o A model class for PoliticalParty. o It will map to the PoliticalPartyModel table.	Already implemented.
PoliticalLeaderModel	o A model class for PoliticalLeader o It will map to the PoliticalLeaderModeltabl e.	Already implemented.
DevelopmentModel	o A model class for Development. o It will map to the DevelopmentModel table.	Already implemented.

Resources (Serializers)

Class	Description	Status
PoliticalPartySerializer	A serializer for PoliticalPartyModel	Already implemented
PoliticalLeaderSerializer	A serializer for	Already implemented
	PoliticalLeaderModel	
DevelopmentSerializer	A serializer for DevelopmentModel	Already implemented

Resources (Views)

Class	Description	Status
PoliticalPartyView	A class for the get, post,	To be implemented
	patch, delete functionalities	
	on PoliticalPartyModel model.	
PoliticalLeaderView	A class for the get, post,	To be implemented
	patch, delete functionalities	

	on
	PoliticalLeaderModelmodel.
PoliticalLeaderByPartyView	A class for the get To be implemented
	functionality on
	PoliticalLeaderModelmodel.
DevelopmentView	A class for the get, post, To be implemented
	patch, delete functionalities
	on DevelopmentModel model .
DevelopmentByLeaderView	A class for the get To be implemented
	functionality by leader on
	DevelopmentModelmodel.

Resources (Exceptions)

Class	Description	Status
IPoliticalPartyIdNotAvailable	Object of this exception class is	Already implemented.
	supposed to be returned in case	
	specified political party id is not	
	available.	
PoliticalLeaderIdNotAvailable	Object of this exception class is	Already implemented.
	supposed to be returned in case	
	specified political leader id is not	
	available.	
DevelopmentIdNotAvailable	Object of this exception class is	Already implemented.
	supposed to be returned in case	
	specified development id is not	
	available.	

InvalidData	Object of this exception class is	Already implemented.
	supposed to be returned in case	
	received data is invalid.	
PoliticalLeaderIdNotAvailable	Object of this exception class is	Already implemented.
	supposed to be returned in case	
	specified political leader id is not	
	available.	
PoliticalPartyIdNotAvailable	Object of this exception class is	Already implemented.
	supposed to be returned in case	
	specified political party id is not	
	available.	

6 Considerations

- A. There are no roles in this application
- B. You can perform the following 3 possible actions

PoliticalParty
PoliticalLeader
Development

- 1. All actions like build, compile, running application, running test cases will be through Command Terminal.
- To open the command terminal the test takers, need to go to
 Application menu (Three horizontal lines at left top) -> Terminal -> New Terminal.
- 3. The editor Auto Saves the code.
- 4. If you want to exit(logout) and to continue the coding later anytime (using Save & Exit option on Assessment Landing Page) then you need to use CTRL+Shift+B command compulsorily on code IDE. This will push or save the updated contents in the internal git/repository. Else the code will not be available in the next login.
- 5. These are time bound assessments the timer would stop if you logout and while logging in back using the same credentials the timer would resume from the same time it was stopped from the previous logout.
- 6. To test any Restful application, the last option on the left panel of IDE, you can find ThunderClient, which is the lightweight equivalent of POSTMAN.
- 7. To test any UI based application the second last option on the left panel of IDE, you can find Browser Preview, where you can launch the application.
- 8. Install 'djangorestframework' module before running the code. For this use the following command.

pip install djangorestframework

9. Use the following command to run the server

python3 manage.py runserver

10. Mandatory: Before final submission run the following commands to execute testcases

python3 manage.py test partyapp.test.test_functional python3 manage.py test partyapp.test.test_exceptional python3 manage.py test partyapp.test.test_boundary

- 11. To test rest end points
 - Click on 'Thunder Client' or use Ctrl+Shift+R ->Click on 'New Request' (at left side of IDE)
- 12. Once you are done with development and ready with submission, you may navigate to the previous tab and submit the workspace. It is mandatory to click on "Submit Assessment" after you are done with code.
- 13. You need to use CTRL+Shift+B command compulsorily on code IDE, before final submission as well. This will push or save the updated contents in the internal git/repository, and will be used to evaluate the code quality.
